San Juan Water District Granite Bay, California

Final Budget
Fiscal Year 2013-2014

San Juan Water District

Fiscal Year 2013 – 2014 Wholesale Budget Fiscal Year 2013 – 2014 Retail Budget

Prepared by the Finance and Administrative Services Department Under Direction of the General Manager and Assistant General Manager

All the water we have today is all the water we'll have on this earth.

~~National Geographic

Mission

Our mission, and highest priority to our customers, is to take all necessary actions to ensure the delivery of a reliable water supply of the highest quality at reasonable and equitable costs. As part of accomplishing our mission, we commit to working cooperatively with others on projects of mutual public benefit to achieve the greatest possible efficiency and effectiveness. We further commit to communicate what we are doing, and why we are doing it.

Letter of Transmittal

Board of Directors
San Juan Water District

Directors:

It is our pleasure to present to you the Fiscal Year 2013-2014 Budget for the San Juan Water District ("District") for both Wholesale and Retail, presented in separate sections. The budget format was updated substantially last year with additional improvements incorporated this year in the continuing effort to provide a user-friendly document that conveys the dedication as well as the accomplishments and goals of the District Board of Directors ("Board") and staff.

Budget Process

The District's official budget process begins each year with a Manager's meeting to establish the overall District goals and provide a basic timeline. Any guidelines from the Board are discussed at this time to set the parameters. In February, the Finance & Administrative Services Manager provides the Division and Department Managers with their respective projected personnel budgets and the current fiscal years adopted budget compared to the projected actual expenses. The managers then prepare draft budgets and submit them within approximately three to four weeks for compilation.

The proposed budget is then reviewed by all Division and Department Managers to determine whether:

- ✓ District goals will be met within the budget;
- ✓ all necessary items have been included; and
- ✓ revenues will be sufficient to cover expenses.

A summary of the proposed budget is reviewed with the Finance Committee in March and/or April. The proposed budget is then discussed with the Board of Directors in April and the draft document is distributed to the Board. Generally, the Finance & Administrative Services Manager presents the wholesale budget/rates to the Board at the second meeting in April and the retail budget/rates at the second meeting in May. The District holds the public hearings for wholesale budget/rates at the second meeting in April and retail budget/rates at the second meeting in May. The anticipated dates of adoption for the wholesale budget/rates and retail budget/rates are the first meeting of May and June, respectively.

Budgetary Control and Budget Format

District management uses the approved budget as the tool for ensuring adequacy of District resources in meeting District needs and assessing planned versus actual activities throughout the fiscal year. The General Manager controls the budget at the operating level.

The budget is prepared on an accrual basis (reporting revenues and expenses are earned and incurred, respectively) and is the same as reported in the Comprehensive Annual Financial Report. The program budget format is used versus a line item detail format to provide the most valuable information to the reader on all of the District's major areas of service (while detail is also included for reference):

- Wholesale
 - Operations
 - Non-Operating
 - Capital Improvement Program
- Retail
 - Operations
 - Non-Operating
 - Capital Improvement Program

Operations are further broken out by program area: Administrative & General, Conservation, Customer Service (Retail), Engineering, Pumping & Telemetry (Retail), Source of Supply, Transmission & Distribution and Water Treatment (Wholesale). The program area budget places the focus on overall District operations, leaving District management responsible for oversight of day-to-day operating expenses.

Budget Highlights

The economic climate and water conservation focus will again present challenges to agencies throughout California, as well as the nation. Water agencies in particular are faced with maintaining and improving aging infrastructure at a time when declining revenues have been the result of the economy and conservation (both encouraged and due to weather). The District has remained proactive and shares the following budget highlights:

Revenues

- Property Taxes: The District has prepared this budget based upon the assumption that the 1% property tax revenue will continue to be received by the District in accordance with Proposition 1A protecting local revenues.
- Wholesale Water Rates: The Wholesale Water Rates are included with a 3% rate increase effective January 1, 2014.

 Note: This increase was recommended in the Wholesale Financial Plan Update and is subject to Board of Directors approval.
- Retail Water Rates: The Retail Water Rates are included with a 2% rate increase effective January 1, 2014.

 Note: This increase was recommended in the Retail Financial Plan Update and is subject to Board of Directors approval.
- © Connection Fees: With a lagging economy, development has remained low with connection revenues incorporated into the budget accordingly. There has been recent Retail connection activity and additional anticipated during the year. As these revenues are specifically for expansion related capital projects, timing of the projects

is continuously evaluated in order to pair the funding with the need and resulting project.

Expenses

- Operating Costs: While operating costs are estimated as a part of long-term financial planning, budgets are prepared based upon a variety of current factors discussed under Budget Assumptions. At budget planning time, budget versus actual performance is incorporated to reflect cost savings or increases as appropriate. Expenses may be based on stable or dynamic activities which affect the budgetary need (e.g. regular versus temporary personnel, normal operations, new or limited-term programs, etc.).
- Debt Service: These costs remain relatively stable in accordance with current debt service schedules as no new debt is planned.
- ☑ Capital Improvement Program: Any savings on particular capital projects are generally maintained within the capital reserve for those projects that cost more than expected, unless the Board of Directors determines otherwise.

Strategic Goals and Priorities

In accordance with the District's mission referenced at the beginning of this document, the Board of Directors holds an annual workshop to develop short and long-range strategic goals and priorities. This workshop is generally held in February or March over one or two days and is facilitated to assist the Board with this process. In advance of the workshop, individual Board members have an opportunity to discuss their priorities with the facilitator. The workshop held in January 2013 led to the following major goals and/or priorities (full summary is available on the District's website):

Water Supply Reliability

- Continue investigating strategic questions (dry year supplies, influence statewide solutions).
- Estimate minimum supply in all months, desired supply in all months and then assess what flexibility there is to participate in other opportunities.
- Assess how well Term 14 will provide assurances for water rights and entitlements.
- Clarify WSR objectives and develop policy guidelines regarding participation in other opportunities (e.g., shipping water south, cooperating with agencies outside the region).

State and Federal Activities

Prioritize State, Federal and Community Actions.

Groundwater Contamination

 Following review of contracts, decide whether to develop an aquifer storage and recovery policy and program.

Water Management and Shortage Supply

Continue analyzing consolidation for water management.

Financial Policies and Funds

The District maintains long-term financial plans to evaluate the impact of operating factors and performance on water rates and reserves. These plans are continually reviewed ad updated to ensure they provide reliable data. These plans are prepared using current budgetary and year-end actual information as available. Balanced budgets are prepared where revenues exceed expenses in order to provide for debt service, capital project and reserve funding, unless otherwise determined by the Board (i.e. special purpose or project).

The District operates a single enterprise fund, which is segregated into non-operating activities, wholesale operations and retail operations which is reported as such in the Budget and Comprehensive Annual Financial Report. This fund is further segregated as designated by District Ordinance and Board of Directors beginning on page 11.

Investment Policy and Investments

The District's current Investment Policy was developed and approved in accordance with California Government Code Section 53600. This Policy is reviewed annually by staff with amendments last approved by the Board in December 2008. In March 2007, the District was awarded the Investment Policy Certification by the Association of Public Treasurers of United States & Canada. This award demonstrates to the Board and the public that the District has developed a thorough policy that complies with applicable statutes. It is recommended that the District re-certify the policy every three years.

Authority for the investment program has been delegated to the General Manager or his/her designee. The District is currently authorized to invest in the following instruments, as allowed under the Investment Policy (see the Investment Policy for specific restrictions):

- \$ United States Treasury Securities maturing in five years or less;
- \$ Agencies of the Federal Government;
- \$ Obligations of the State of California and any Local Agency within the state;
- \$ Banker's Acceptances:
- \$ Commercial Paper;
- \$ Certificates of Deposit:
- \$ State of California Local Agency Investment Fund:
- \$ Medium-term notes or Corporate issues maturing in five years or less;
- \$ Mutual funds; and
- \$ Interest bearing, FDIC-insured checking and savings accounts.

Accounting System and Controls

The District utilizes project cost accounting in the Microsoft Dynamics SL Solomon Professional 6.5 financial information system to record financial transactions throughout the year. At the end of the fiscal year, June 30, the District prepares a Comprehensive Annual Financial Report ("CAFR") containing financial statements and other financial and operational information. An independent auditing firm audits this report, as well as District records and documentation, each year and reports its findings to the Board.

Awards

The Government Finance Officers Association of the United States and Canada (GFOA) presented a Distinguished Budget Presentation Award to San Juan Water District for its annual budget for the fiscal year beginning July 1, 2012. In order to receive this award, a governmental unit must publish a budget document that meets program criteria as a policy document, as an operations guide, as a financial plan, and as a communications device.

This award is valid for a period of one year only. We believe our current budget continues to conform to program requirements, and we are submitting it to GFOA to determine its eligibility for another award.

In addition, the District has been awarded the Certificate of Achievement for Excellence in Financial Reporting by the Government Finance Officers' Association for the 2011-2012 CAFR which is the seventh consecutive year for recent awards.

We hope this budget provides useful information on the District's operations to readers. We would like to thank the District's Management Team for their diligence in preparing and managing their budgets. We would also like to thank the Board of Directors for their continued support of the important services that the District provides.

Distinguished Budget Presentation Award

PRESENTED TO

San Juan Water District California

For the Fiscal Year Beginning

July 1, 2012

Christoph P Movill Giffry P. Ener

President

Executive Director

Profile

The District initially began as the North Fork Ditch Company dating back to 1854 providing water to the area. The San Juan Water District as in existence today was formed as the result of petitions being presented to the Board of Supervisors of Sacramento and Placer Counties by Citrus Heights Water District, Fair Oaks Water District, Orange Vale Water Company and a group of homeowners in South Placer County. An election was then held within the boundaries of the sponsoring districts on February 10, 1954. At this election, voters approved the formation of the San Juan Water District by nearly a two-thirds majority and elected five Directors. The District is a community services district formed under Section 60000 et seq., Title 5, Division 3 of the California Government Code.

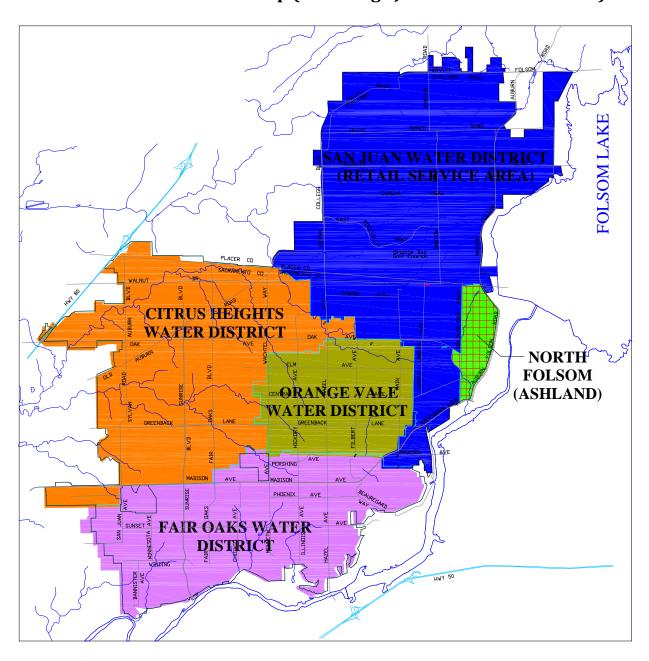

The District provides water on a wholesale and retail basis to an area of approximately 46 square miles for wholesale (which includes the retail area) and 17 square miles for retail in Sacramento and Placer Counties. The District's wholesale agency consists of delivering water to the retail agencies under negotiated contracts; operating a surface water treatment plant and storage, transmission facilities; and providing the administrative support related to those activities. The Retail agency consists of storage, pumping, transmission and distribution facilities (which deliver water to approximately 10,348 active retail service connections located in a portion of Northeast Sacramento County and the Granite Bay area of South Placer County) and providing the administrative, customer service, conservation and engineering support related to those activities.

The District's existing water supply consists of three separate raw water contracts. The first source of water is 33,000 acre-feet of pre-1914 water rights on the American River. The second source is a contract with the U.S. Bureau of Reclamation for 24,200 acre-feet of Central Valley Project water. The District completed the process of long-term water contract negotiations with the U.S. Bureau of Reclamation for Central Valley Project water resulting in a 40 year long-term contract. The third water source is a contract with Placer County Water Agency for 25,000 acrefeet of water. All sources of surface water are either stored or flow through Folsom Lake and delivery is taken at Folsom Dam outlets, either by gravity or pumped by the U.S. Bureau Folsom Pumping Plant. Total raw water delivery for the Fiscal Year 2010-2011 was 42,517 acre-feet and is anticipated to be 42,550 acre-feet for Fiscal Year 2011-2012, excluding pass through deliveries for Sacramento Suburban Water District.

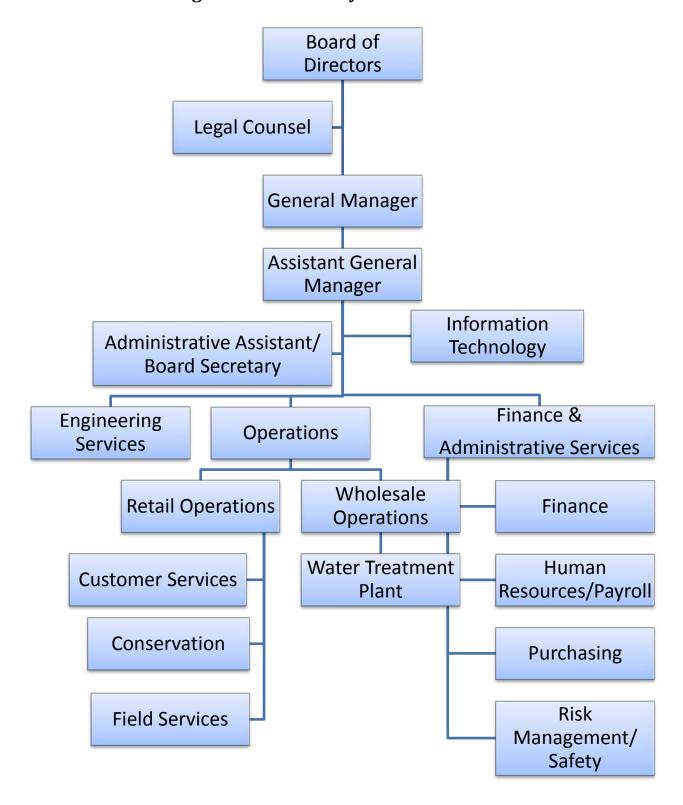

The District's water treatment facilities, Sidney N. Peterson Water Treatment Plant, was constructed in three phases and completed between the years of 1975 to 1983. The facilities include two flocculation-sedimentation basins, two filter basins, operations building and storage reservoir. Major upgrades and improvements to the plant in 2005 and 2009-2011 added a solids handling facility and chlorine storage/handling facility to the plant. These two projects along with other capital projects increased efficiency and productivity to meet the required demands of customers and improved operations to help meet Federal and State regulatory requirements.

With a reliable capacity of approximately 130 million gallons per day, the plant receives delivery of raw water directly from Folsom Dam outlets. The raw water undergoes an extensive water treatment process to ensure the highest quality of water for all District customers. From the water treatment plant, the water flows into the 62 million gallon Hinkle Reservoir for storage and distribution. The District maintains approximately 214 miles of transmission and distribution pipelines, which transport the high quality treated water to wholesale and retail customers.

District-Wide Budget Information and Summaries

Budget Assumptions

While both the Wholesale and Retail Water Rate Study and Financial Plans use a variety of policy and operational assumptions for purposes of determining rate structures and long-range financial plans, these are revisited at the time of budget development each fiscal year.

Many assumptions are relevant to both the District's Wholesale and Retail operations in the area of Salaries and Benefits which have been previously discussed and approved. These cannot be altered separately due to the fact that employees may be assigned to Wholesale operations, Retail operations or a combination to allow the most efficient use of District talent. The following budget assumptions are proposed:

WHOLESALE

Revenues

Property Taxes

Assessed values contain an inflation factor for each county combined with growth or decline factors and overall expect a moderate increase. Property tax revenues are utilized to fund the capital improvement programs.

COP Payments for Direct Debt

This will include those payments for direct debt related to the 2009 Certificates of Participation and 2012 Refunding Bonds.

Interest on Investments

The market remains low, but the District will seek investment opportunities in accordance with the *Investment Policy* as they arise. Income will be estimated at current market rates, currently approximately .5% and updated to reflect changes.

Communication Site Leases

Amounts for the four communication site lessees are escalated by 5% annually.

SMUD California Oregon Transmission Project (COTP) Lease Payment The amount will be included per the schedule contained within the contract.

Wholesale Customer Agencies Connections and Water Deliveries
The deliveries included in the budget are those that have been confirmed by the
Wholesale Customer Agencies. Revenue requirements as established and updated
include the water use charges, annual service charge and debt service charge. The
District did not implement a rate increase effective January 1, 2013. The proposed rate
increase included in the updated Wholesale Financial Plan is 3% effective January 1,
2014. It is anticipated that Sacramento Suburban Water District will not receive treated
water deliveries; therefore, no revenue is included.

Cooperative Transmission Pipeline Cost Share

Revenue is included as estimated based upon historical activity, absent other factors, in accordance with the agreement.

California Solar Initiative (CSI) Rebate

Anticipated rebate amount will be based upon solar project estimates and updated for current trending. This rebate will be received through Fiscal Year 2016. The Board directed staff to ensure that the CSI Rebate and energy cost savings are used to replace capital reserves and therefore will not be available for operating cost savings.

Expenses

Cost of Water Supply

Based upon the assumption of water deliveries to Wholesale Customer Agencies above, the cost of water supply will be estimated first using water rights water, then a combination of water under the PCWA and USBR contracts, as applicable, with no temporary water supply use necessary.

Operations and Maintenance Costs

Each cost category is examined individually and incorporated into the budget using a modified zero-based budgeting approach to determine resources needed for the coming budget year. Prior year budget amounts are not simply escalated using inflation factors. Where it is impractical to use this method, inflation factors will be applied as developed in the financial plan and updated to reflect current trends. Inflation factors range from 3% to 5% depending upon category, unless more precise information is known.

Cost of Living Allowance ("COLA")

COLA is included per Board policy and is currently estimated to be 3.1%.

Note: As determined by a majority vote of the Board of Directors on May 15, 2013, the COLA effective July 1, 2013 will be 2% indexed to the CPI for February 2013. After the February 2014 CPI is available if the change remains at 3.1%, employees will receive a 1% COLA one-time payment that would not increase base salary in future years.

Facilities Costs

Operations and maintenance costs for facilities will be allocated to the wholesale and retail operations based upon benefit received as they currently are.

RETAIL

Revenues

Property Taxes

Assessed values contain an inflation factor for each county combined with growth or decline factors and overall expect a moderate increase. Property tax revenues are utilized to fund the capital improvement programs.

Connection Fees

New connections will be estimated by Engineering staff and budgeted accordingly.

Interest on Investments

The market remains low, but the District will seek investment opportunities in accordance with the *Investment Policy* as they arise. Income will be estimated at current market rates, currently approximately .5% and updated to reflect changes.

Retail Customer Base and Water Consumption

The customer base and water consumption included in the budget will reflect anticipated water deliveries as included in the Wholesale budget which would include any water loss.

Miscellaneous Fees

Fire service, late fees/penalties, and flow/pressure analysis revenues will be estimated by appropriate staff.

Grants

Conservation program estimates for grant monies will be included.

Expenses

Cost of Water Supply

This cost comes directly from the Wholesale Water Rate Study/Financial Plan incorporating any adjustments for consumption and variation in water rates and will include water use charges, annual service charge and debt service charge.

Operations and Maintenance Costs

Each cost category is examined individually and incorporated into the budget using a modified zero-based budgeting approach to determine resources needed for the coming budget year. Prior year budget amounts are not simply escalated using inflation factors. Where it is impractical to use this method, inflation factors will be applied as developed in the financial plan and updated to reflect current trends. Inflation factors range from 3% to 5% depending upon category, unless more precise information is known.

Cost of Living Allowance ("COLA")

COLA is included per Board policy and is currently estimated to be 3.1%.

Note: As determined by a majority vote of the Board of Directors on May 15, 2013, the COLA effective July 1, 2013 will be 2% indexed to the CPI for February 2013. After the February 2014 CPI is available if the change remains at 3.1%, employees will receive a 1% COLA one-time payment that would not increase base salary in future years.

Facilities Costs

Operations and maintenance costs for facilities will be allocated to the wholesale and retail operations based upon benefit received as they currently are.

Budget Summary

Although the District maintains operations for both San Juan Water District Wholesale and San Juan Water District Retail, the District is established as one entity. As the District allocates employees and resources to Wholesale and Retail as required for operations, this document contains a variety of information as it relates to each separate operation and both combined. This is similar to reporting you might see for a water agency that provides both potable and wastewater operations with a single budget document that includes information on both segments.

The Budget Summary below shows both the breakdown for each operation and the total for the entire District.

San Juan Water District

Fiscal Year 2013 - 2014 Budget

Fiscal Year 2013 - 2014 Budget

District Reserves

In accordance with the District's Ordinance related to "Allocated Fund Policy", certain funds will be established and/or maintained. In addition, the Board of Directors may establish funds.

WHOLESALE

Operating Reserve Fund

<u>Description</u>

The Wholesale Operating Reserve was established with the development of the 1998 Wholesale Water Rate Study and Financial Plan. The Wholesale Operating Reserve Fund provides working capital for wholesale operations, as well as provide readily available funds for unexpected needs and accommodate modest variations in deliveries to wholesale customers. The 1998 financial plan gradually built the operating reserve over the five-year planning period, beginning in 1999.

Recommended Amount of Fund

The fund is recommended to include at least 20 percent of annual operating expenditures, including water supply costs.

Restrictions on Use of Funds

The fund was created by Ordinance of the Board of Directors. The intent of the fund is to use for working capital for day to day paying of bills, etc. The use of the fund is within the authority of the Board of Directors.

Rate Stabilization Reserve Fund

Description

The Wholesale Rate Stabilization Reserve Fund was established with the development of the 1998 Wholesale Water Rate Study and Financial Plan. The rate Stabilization Reserve Fund is to help ensure financial and rate stability for wholesale customers. With the elimination of minimum charges for water usage the District's wholesale rate revenues will fluctuate with changes in wholesale deliveries. While the service charge is intended to recover the District's fixed costs, some costs included in the commodity rate will not change with changes in wholesale water purchases.

Recommended Amount of Fund

The Rate Stabilization Reserve Fund is recommended to be \$1 million.

Restrictions on Use of Funds

The fund was created by Ordinance of the Board of Directors. The intent of the fund is to use for unexpected costs to reduce financial and rate variability for wholesale customers. The use of the fund is within the authority of the Board of Directors.

Restricted COP Debt Service Reserve Fund

Description

The Restricted COP Reserve Fund was established to accumulate funds held in reserve by Union Bank of California for the final principal and interest payment on the 1993, 2003 and 2009 Revenue Certificates of Participation.

Fiscal Year 2013 - 2014 Budget

The funds accumulated and held in reserve by Bank of America is for the semi-annual payments of principal and interest due in February and August, and debt service coverage paid by participating agencies.

Required Amount of Fund

The required amount for the Restricted COP Reserve Fund is determined based on the COPS currently outstanding, and is for the final payment of principle and interest due on the outstanding COPs. The amount for the semi-annual payments of principal and interest varies depending on time of year.

Restrictions on Use of Funds

The fund was created by Ordinance of the Board of Directors. The use of funds is restricted to the purposes of the fund.

Restricted Employee Reserve Fund

Description

The Restricted Employee Reserve Fund was established to accumulate funds for employees' pre-tax monies to be held in trust by the District for Dependent Care and Unreimbursed Medical expenses. The funds are held in reserve to pay claims submitted by enrolled employees.

Required Amount of Fund

The amount held in reserve for Dependent Care and Unreimbursed Medical expenses depends on the election amounts by employees to contribute to their fund, and the status of paid claims.

Restrictions on Use of Funds

The fund was created by Ordinance of the Board of Directors. The use of funds is restricted to the purposes of the fund.

Restricted PERS Rate Stabilization Reserve Fund

Description

The Restricted PERS Reserve Fund was established for PERS stabilization in order to level out the amount budgeted for PERS payments on an annual basis.

Required Amount of Fund

SJWD budgets for the normal cost of PERS retirement that is estimated by an actuarial evaluation as an average payment over an extended period of time. When the actual PERS costs are lower than the normal costs, the difference is placed in this fund. When the PERS costs are higher than the normal costs, the difference is withdrawn from this fund.

Restrictions on Use of Funds

The fund was created by Ordinance of the Board of Directors. The use of funds is restricted to the purposes of the fund.

Compensated Absence Reserve Fund

Description

The Compensated Absence Reserve Fund was established to accumulate funds for

accrued employees vacation and sick leave time.

Required Amount of Fund

The amount held in reserve for accrued employees vacation and sick leave time is dependent on the dollar value of the accrued vacation and vested sick leave amounts.

Restrictions on Use of Funds

The fund was created by Ordinance of the Board of Directors. The use of funds is restricted to the purposes of the fund.

Delta/Water Rights Reserve Fund

Description

The Delta/Water Rights Reserve Fund was established to cover Delta issues that affect the District's water rights with the ability to transfer the reserve fund to the Hinkle Reserve Fund if the funds are not needed for that purpose.

Recommended Amount of Fund

The Delta/Water Rights Reserve Fund recommended amount is determined by the Board of Directors and is currently funded at the rate of \$50,000 annually.

Restrictions on Use of Funds

The fund was created by a vote of the Board of Directors. The intent of the fund is to use for delta and water rights issues, but is within the authority of the Board of Directors.

Capital Improvement Program Reserve Fund

Description

The Wholesale Capital Improvement Reserve Fund was established with the development of the 1998 Wholesale Water Rate Study and Financial Plan. The Capital Improvement Reserve Fund represents funds available for capital replacements, rehabilitation, upgrades, and improvements. The reserve fund is funded through planned contributions as designated by the Board of Directors.

Recommended Amount of Fund

The Capital Improvement Reserve Fund recommended amount fluctuates based on capital improvements planned and completed. The recommended amount is listed in the current Wholesale Financial Plan.

Restrictions on Use of Funds

The fund was created by Ordinance of the Board of Directors. The intent of the fund is to use for planned capital replacements, rehabilitation, upgrades and improvements. The use of the funds is not for future development. The use of the fund is intended for projects that benefit existing customers, but is within the authority of the Board of Directors.

Connection Fee Reserve Fund

Description

The Wholesale Connection Fee Reserve Fund was established with the development of the 1998 Wholesale Water Rate Study and Financial Plan. The Connection Fee

Fiscal Year 2013 - 2014 Budget

Reserve Fund represents funds available for capital replacements, rehabilitation, upgrades, and improvements that provide additional capacity for future development. The reserve fund is funded through connection fees paid by new connections to the District water distribution system.

Recommended Amount of Fund

The Connection Fee Reserve Fund recommended amount fluctuates based on capital improvements planned and completed. The recommended amount is listed in the current Wholesale Financial Plan.

Restrictions on Use of Funds

The fund was created by Ordinance of the Board of Directors. This fund must be used to fund projects for future development that provide additional capacity to handle future development. The Board has the authority to make the decision on which projects to fund as long as they benefit future customers.

Hinkle Lining Sinking Reserve Fund

Description

The Wholesale Hinkle Lining Sinking Reserve Fund was established in the 1980s. The Hinkle Lining Sinking Reserve Fund accumulates monies for the eventual replacement of the lining and cover for Hinkle Reservoir. The Wholesale Hinkle Lining Sinking Reserve Fund is shown as a reserve within the Wholesale Capital Fund.

Recommended Amount of Fund

There is not a recommended amount for this fund. \$50,000 is added to this fund at the end of each fiscal year.

Restrictions on Use of Funds

The fund was created by Ordinance of the Board of Directors. The intent of the fund is to use for the future replacement of the lining and cover of the Hinkle Reservoir. The use of the fund is within the authority of the Board of Directors.

Vehicle and Equipment Reserve Fund

Description

The Wholesale Vehicle and Equipment Reserve Fund was established to accumulate sufficient funds to replace vehicles and equipment on an annual basis, and larger equipment on an as-need basis.

Recommended Amount of Fund

The recommended amount for the Vehicle and Equipment Reserve fund varies depending on the future planned replacements of vehicles and equipment.

Restrictions on Use of Funds

The fund was created by Ordinance of the Board of Directors. The intent of the fund is to use for the future replacement of vehicles and equipment. The use of the vehicle and equipment reserve fund is within the authority of the Board of Directors.

RETAIL

Operating Reserve Fund

Description

The Retail Operating Reserve was established with the development of the 1998 Wholesale Water Rate Study and Financial Plan. The Retail Operating Reserve Fund provides working capital for retail operations, as well as provide readily available funds for unexpected needs and accommodate modest variations between expected and actual water demands. The 2000 retail financial plan gradually built the operating reserve over the five-year planning period, beginning in 2001.

Recommended Amount of Fund

The fund is recommended to include at least 20 percent of annual operating expenditures, including water supply costs.

Restrictions on Use of Funds

The fund was created by Ordinance of the Board of Directors. The intent of the fund is to use for working capital for day to day paying of bills, etc. The use of the fund is within the authority of the Board of Directors.

Restricted COP Reserve Fund

Description

The Restricted COP Reserve Fund accumulates and holds in reserve monies for the semi-annual payments of principal and interest due in February and August.

Required Amount of Fund

The required amount for the Restricted COP Reserve Fund varies depending on time of year, and the status of the semi-annual payments.

Restrictions on Use of Funds

The fund was created by Ordinance of the Board of Directors. The use of the funds is restricted to the purposes of the fund.

Restricted EDA Loan Debt Reserve Fund

Description

The Restricted EDA Loan Debt Reserve Fund was established to accumulate funds held in reserve for the annual payment of principal and interest on the E.D.A. Loan. Annual debt service payment is made in June.

Required Amount of Fund

The required amount for the Restricted EDA Loan Debt Reserve Fund varies depending on time of year, and the status of the annual payment.

Restrictions on Use of Funds

The fund was created by Ordinance of the Board of Directors. The use of funds is restricted to the purposes of the fund.

Developer/Customer Deposits Reserve Fund

Description

The Retail Developer/Customer Deposits Reserve Fund was established to contain funds contributed as a deposit for work to be completed by the District.

Recommended Amount of Fund

The Retail Capital Facilities Fees Reserve Fund recommended amount fluctuates based on the actual amount of funds on deposit.

Restrictions on Use of Funds

The fund was created by Ordinance of the Board of Directors. This fund must be used for funds on deposit for developers or customers. When the project is completed, any remaining funds are returned to the developer or customer.

Restricted Employee Reserve Fund

Description

The Restricted Employee Reserve Fund was established to accumulate funds for employees' pre-tax monies to be held in trust by the District for Dependent Care and Unreimbursed Medical expenses. The funds are held in reserve to pay claims submitted by enrolled employees.

Required Amount of Fund

The amount held in reserve for Dependent Care and Unreimbursed Medical expenses depends on the election amounts by employees to contribute to their fund, and the status of paid claims.

Restrictions on Use of Funds

The fund was created by Ordinance of the Board of Directors. The use of funds is restricted to the purposes of the fund.

Restricted PERS Rate Stabilization Reserve Fund

Description

The Restricted PERS Reserve Fund was established for PERS stabilization in order to level out the amount budgeted for PERS payments on an annual basis.

Required Amount of Fund

SJWD budgets for the normal cost of PERS retirement that is estimated by an actuarial evaluation as an average payment over an extended period of time. When the actual PERS costs are lower than the normal costs, the difference is placed in this fund. When the PERS costs are higher than the normal costs, the difference is withdrawn from this fund.

Restrictions on Use of Funds

The fund was created by Ordinance of the Board of Directors. The use of funds is restricted to the purposes of the fund.

Compensated Absence Reserve Fund

Description

The Restricted Employee Reserve Fund was established to accumulate funds for accrued employees vacation and sick leave time.

Required Amount of Fund

The amount held in reserve for accrued employees vacation and sick leave time is dependent on the dollar value of the accrued vacation and vested sick leave amounts.

Restrictions on Use of Funds

The fund was created by Ordinance of the Board of Directors. The use of funds is restricted to the purposes of the fund.

Capital Improvement Reserve Fund

Description

The Retail Capital Improvement Reserve Fund was established to contain funds available for capital replacements, rehabilitation, upgrades, and improvements. The

Fiscal Year 2013 - 2014 Budget

reserve fund is funded through planned contributions as designated by the Board of Directors.

Recommended Amount of Fund

The Capital Improvement Reserve Fund recommended amount fluctuates based on capital improvements planned and completed. The recommended amount is listed in the current Retail Financial Plan.

Restrictions on Use of Funds

The fund was created by Ordinance of the Board of Directors. The intent of the fund is to use for planned capital replacements, rehabilitation, upgrades and improvements. The use of the funds is not for future development. The use of the fund is intended to be to benefit existing customers, but is within the authority of the Board of Directors.

Capital Facilities Fees Reserve Fund

Description

The Retail Capital Facilities Fees Reserve Fund was established to contain funds available for capital replacements, rehabilitation, upgrades, and improvements that provide additional capacity to provide service to additional connections. The reserve fund is funded through connection fees paid by new connections to the District water distribution system.

Recommended Amount of Fund

The Retail Capital Facilities Fees Reserve Fund recommended amount fluctuates based on capital improvements planned and completed. The recommended amount is listed in the current Retail Financial Plan.

Restrictions on Use of Funds

The fund was created by Ordinance of the Board of Directors. This fund must be used to fund projects that provide capacity for additional connections to the retail service area. The Board has the authority to make the decision on which projects to fund as long as they benefit future customers.

Retail Emergency CIP Reserve Fund

Description

The Retail Emergency CIP Reserve Fund was established to build up a reserve to pay for improvement necessary to provide a water supply to the retail service area in times of emergencies. The reserve fund is funded through planned contributions as designated by the Board of Directors.

Recommended Amount of Fund

The Capital Improvement Reserve Fund recommended amount fluctuates based on actual contributions by the Board of Directors.

Restrictions on Use of Funds

The fund was created by Ordinance of the Board of Directors. The use of the fund is within the authority of the Board of Directors.

Kokila Reservoir Lining Replacement Reserve Fund

Description

The Retail Kokila Reservoir Lining Replacement Reserve Fund was established in the 1980s. The Kokila Reservoir Lining Replacement Reserve Fund accumulates monies for the eventual replacement of the lining and cover for Kokila Reservoir. The Retail Kokila Reservoir Lining Replacement Reserve Fund is shown as a reserve within the Retail Capital Fund.

Recommended Amount of Fund

There is not a recommended amount for this fund. \$10,000 is added to this fund at the end of each fiscal year.

Restrictions on Use of Funds

The fund was created by Ordinance of the Board of Directors. The intent of the fund is to use for the future replacement of the lining and cover of the Kokila Reservoir. The use of the fund is within the authority of the Board of Directors.

Vehicle and Equipment Reserve Fund

<u>Description</u>

The Retail Vehicle and Equipment Reserve Fund was established to accumulate sufficient funds to replace vehicles and equipment on an annual basis, and larger equipment on an as-need basis.

Recommended Amount of Fund

The recommended amount for the Vehicle and Equipment Reserve fund varies depending on the future planned replacements of vehicles and equipment.

Restrictions on Use of Funds

The fund was created by Ordinance of the Board of Directors. The intent of the fund is to use for the future replacement of retail vehicles and equipment. The use of the vehicle and equipment reserve fund is within the authority of the Board of Directors.

Resolution - Wholesale

RESOLUTION NO. 13-08

A RESOLUTION OF THE BOARD OF DIRECTORS OF THE SAN JUAN WATER DISTRICT ADOPTING THE NON-OPERATING, CAPITAL IMPROVEMENT PROGRAM, WHOLESALE BUDGET, RATES AND FEES FOR THE FISCAL YEAR 2013-2014

WHEREAS, District staff has prepared a budget for the fiscal year 2013-2014 that estimates operating and maintenance, capital improvement program, debt service and other expenses of the District and that estimates revenues from all sources to pay the expenses of the District;

WHEREAS, District staff has determined that the fiscal year 2013-2014 budget is reasonably accurate and if implemented will ensure that the District's revenues will be sufficient to pay all of the District's expenses, including maintaining prudent reserves; and

WHEREAS, staff has determined that the District's wholesale water rates and capital facilities (connection) fees need to be adjusted for fiscal year 2013-2014 to account for the increased costs of providing such services.

NOW, THEREFORE, BE IT RESOLVED by the Board of Directors of San Juan Water District as follows:

- 1. The Board of Directors finds that the Non-Operating, Capital Improvement Program and Wholesale budgets as proposed by staff fairly and accurately represents the estimated expenses and revenues of the District for the fiscal year beginning on July 1, 2013 and ending on June 30, 2014 and that the budget adequately ensures that the District will be able to cover its expenses and maintain prudent reserves, and on that basis the Board hereby adopts the District's fiscal year 2013-2014 budget (with any revisions that the Board may deem prudent as a condition of adopting said budget). A copy of the fiscal year 2013-2014 District budget is attached as "Exhibit A" and made a part of this Resolution.
- 2. The Board of Directors finds that the proposed Wholesale Water Rates and Wholesale Capital Facilities (Connection) Fees for fiscal year 2013-2014 are fair, equitable and ensure that the persons and entities receiving such services will pay the District's full costs of providing such services, and on that basis the Board hereby adopts the proposed rates and fees for the 2013-2014 fiscal year (with any revisions that the Board may deem prudent as a condition of adopting said rates and fees). The fiscal year 2013-2014 Wholesale Water Rates and Wholesale Capital Facilities (Connection) Fees are shown within "Exhibit A", which is attached to and made a part of this Resolution.

3. The General Manager and staff are directed to take all actions necessary to implement and follow the fiscal year 2013-2014 budget and to impose and collect the rates and fees shown in Exhibit A, as the same are adopted herein.

PASSED AND ADOPTED by the Board of Directors of the San Juan Water District on the 15th day of May 2013, by the following vote:

AYES: DIRECTORS: Costa, Tobin, Walters

NOES: DIRECTORS: Miller, Peterson DIRECTORS:

Resolution - Retail

RESOLUTION NO. 13-11

A RESOLUTION OF THE BOARD OF DIRECTORS OF THE SAN JUAN WATER DISTRICT ADOPTING THE RETAIL BUDGET, RATES AND FEES FOR THE FISCAL YEAR 2013-2014

WHEREAS, District staff has prepared a retail budget for the fiscal year 2013-2014 that estimates operating and maintenance, capital improvement program and other expenses of the District and that estimates revenues from all sources to pay the expenses of the District;

WHEREAS, District staff has determined that the fiscal year 2013-2014 retail budget is reasonably accurate and if implemented will ensure that the District's revenues will be sufficient to pay all of the District's expenses, including maintaining prudent reserves; and

WHEREAS, staff has determined that the District's retail water rates, retail capital facilities (connection) fees, alternative retail capital facilities fees, other fees and deposits need to be adjusted for fiscal year 2013-2014 to account for the increased costs for providing such services.

NOW, THEREFORE, BE IT RESOLVED by the Board of Directors of San Juan Water District as follows:

- 1. The Board of Directors finds that the retail budget as proposed by staff fairly and accurately represents the estimated expenses and revenues of the District for the fiscal year beginning on July 1, 2013 and ending on June 30, 2014 and that the budget adequately ensures that the District will be able to cover its expenses and maintain prudent reserves, and on that basis the Board hereby adopts the District's fiscal year 2013-2014 budget (with any revisions that the Board may deem prudent as a condition of adopting said budget). A copy of the fiscal year 2013-2014 District budget is attached as "Exhibit A" and made a part of this Resolution.
- 2. The Board of Directors finds that the proposed retail water rates, retail capital facilities (connection) fees, alternative retail capital facilities fees, other fees and deposits for fiscal year 2013-2014 are fair, equitable and ensure that the persons and entities receiving such services will pay the District's full costs of providing such services, and on that basis the Board hereby adopts the proposed rates and fees for the 2013-2014 fiscal year (with any revisions that the Board may deem prudent as a condition of adopting said rates and fees). The fiscal year 2013-2014 retail water rates, retail capital facilities (connection) fees, alternative retail capital facilities fees, other fees and deposits are shown within "Exhibit A", which is attached to and made a part of this Resolution.

3. The General Manager and staff are directed to take all actions necessary to implement and follow the fiscal year 2013-2014 budget and to impose and collect the rates and fees shown in Exhibit A, as the same are adopted herein.

PASSED AND ADOPTED by the Board of Directors of the San Juan Water District on the 26th day of June 2013, by the following vote:

Salaries and Benefits

As discussed previously, the District's Wholesale and Retail operations share staff with budgeted allocations listed in the Cost Allocation Plan later. With many processes involved with providing water on both a wholesale and retail basis relying upon the labor of employees, the District's salaries and benefits do represent a large portion of the operating budgets. The combined salaries and benefits are listed in the table below.

Total Salary, Benefits, Payroll Taxes and Workers' Compensation Insurance	
Component	Amount
Salaries	\$ 3,911,358
COLA	81,505
Contingency for 2/2014 COLA pursuant to Board Budget Adoption	40,753
Step Increase Within Position Range	94,059
Incentive Award	-
Overtime	186,200
Standby	50,600

Debt Service - District-Wide

Debt Service is combined here to demonstrate all components of District-wide Debt Service; however, Wholesale and Retail Debt Service are presented separately in each respective section of the budget. There is no set debt limit, but debt issuance is evaluated through the financial plans and any issuance must comply with the established covenants. Debt Service is currently comprised of the following:

- California Energy Commission Loan (Retail);
- Economic Development Loan (Retail);
- 2012 Refunding Bonds (Wholesale and Retail); and
- 2009 Certificates of Participation (COPs) (Wholesale and Retail).

While San Juan Water District follows a July 1 through June 30 fiscal year, all other wholesale customers (with exception of the City of Folsom) follow a January 1 through December 31 fiscal year. This table presents the Debt Service payments that will be required during the fiscal year and lists the Debt Service principal and interest (using the accrual method in accordance with Generally Accepted Accounting Principles) for each wholesale customer agency:

San Juan Water District

In accordance with Debt Covenants authorized by the 2012 Refunding Bonds and 2009 COPs, the District must maintain District-wide debt service coverage of at least 1.15. The underlying bond credit rating of both series of COPs is "AA+" by Fitch Ratings which is due to a variety of financial policies of the District, but most significantly:

- Maintaining a debt service coverage of at least 2.0;
- Maintaining a sufficient number of days of liquid cash; and
- Engaging in long-term financial and capital improvement program planning.

While the past several years have presented a slightly lower debt service coverage ratio due to conservation efforts and economic conditions, the District's debt coverage ratio is projected to be at least 2.0 beginning in Fiscal Year 2012-2013. A bond credit rating of "AA+" represents high quality bonds and provides reassurance to investors of the District's debt.

Wholesale Budget

Cost Savings Measures

The District continually evaluates cost-saving measures that support fulfilling its mission. Staff regularly explores options to current processes or projects (treatment, engineering, conservation, administration, capital projects) that may present viable alternatives that save District customers money while providing a high level of service customers expect. To that end, the District has taken the following cost-saving measures in recent history with a summarized table below:

- FY 2011-2012 Employees came forward with no Cost of Living Allowance ("COLA") for July 1, 2011, Increase Within Range or Incentive Compensation for employees which held salaries at current levels saving approximately \$98,900.
- Utilize internal staff on planning, engineering and construction management of capital projects which saves approximately \$300,000 on the cost of outside consultants.
- FY 2011-2012 Primary Coagulant Chemical Evaluation initial savings are approximately \$50,000 using internal staff to investigate, test and permit instead of a consultant with annual savings estimated to be \$47,000-57,000 and have turned out to be over \$350,000 due to reduced chemical costs, electrical and labor costs.
- FY 2008-2009 implemented Information Technology improvements including Virtual Servers and Shared Storage saving \$35,000 annually on reduced hardware, software support, maintenance and electricity with additional annual savings of \$37,500 annually due to elimination of need to fill Information Technology Technician position.
- FY 2011-2012 WEL Garden maintenance reduced annual cost by \$12,000.
- FY 2011-2012 utilized in-house staff to prepare the Process Safety Manual, Illness and Injury Prevention Plan, Vulnerability Assessment, Emergency Response Plan, hazard assessments and related training for safety and regulatory compliance. Estimated savings of approximately \$140,000 compared to the cost of using outside consultants.
- FY 2010-2011 Entry landscape saved \$218,000 by significantly reducing the scope of the landscaping project and using employee volunteers to complete the reduced project during non-working hours.
- FY 2011-2012+ Annual solar savings of \$300,000 and 5 year annual CSI rebate of over \$385,000/year, making the project pay for itself by 2019.
- FY 2011-2012 Refunding Bonds with annual estimated debt service savings of \$65,200 until 2033 when paid off, total \$1,369,200.

 FY 2012-2013 – Identified/evaluated alternative pretreatment process improvements for WTP to take advantage of coagulant chemical changes. CIP reduced by \$1,230,000.

FY	Measure		Savings
2012	No COLA/Step Increase/Incentive Compensation	Total	\$98,900
2012+	Dependent dental employee cost-share	Total	\$4,200
2012+	Internal staff-planning, engineering, construction management	Annual	\$300,000
2012+	Water Treatment Chemical change	Initial	\$50,000
		Annual	\$350,000
2012+	Reduced WEL Garden maintenance	Annual	\$12,000
2012	Regulatory compliance; safety document updates	Total	\$140,000
2009	COP credit rating process in-lieu of bond insurance	Total	\$66,300
2009	CalPERS Contribution prepayment	Total	\$47,515
2009+	AA+ Credit Rating on COPs	Total	\$3,480,000
2009+	IT vitualization & shared storage	Annual	\$72,500
2010	WTP Sedimentation Basin Project	Total	\$1,400,000
2011	WTP Butterfly Valves installed by staff	Total	\$40,000
2011	Treated Water PL/CT Bypass PL Project	Total	\$918,200
2011	Entry landscape reduced scope & EE volunteers	Total	\$218,000
2012+	Solar energy cost savings	Annual	\$300,000
2012-	CA Solar Initiative (CSI) rebate	Annual	\$385,000
2016		Total	\$1,925,000
2013	CIP reduction due to treatment chemical change	Total	\$1,230,000
2012-	Refunding Bonds - lower debt service	Annual	\$65,200
2033		Total	\$1,369,200

Wholesale Water Rate Study and Financial Plan

In 2010, the District contracted with the Reed Group, Inc. to prepare the Wholesale Water Rate Study and Financial Plan due to ongoing capital program needs in order to determine water rates required to fund operations and the capital improvement program over the next ten years. An Ad Hoc Joint Agency Wholesale Budget Review Committee consisting of members from San Juan Water District, Citrus Heights Water District, Fair Oaks Water District, Orange Vale Water Company and City of Folsom was formed to allow these agencies the opportunity to review and provide input through the process.

This update of the financial plan was completed in October 2010 and accepted by the Board. The plan concluded that the District had sufficient funds for operations, maintenance and capital projects with recommended annual increases of 5%. The first wholesale rate increase resulting from that plan was implemented on January 1, 2011.

This budget is prepared with the estimated rates from that plan for budgetary purposes; however, the Board adopts rates as part of the budget process. The following table represents the recommended rate increases to be effective January 1, 2014 over the next five years which are subject to Board approval:

2014	2015	2016	2017	2018
3%	3%	3%	3%	3%

For 2014, staff is recommending a 3% rate increase based upon the 2012 update of the long-term financial plan with the District's rate consultant. There are no significant differences to incorporate into the plan and this increase will maintain District service levels, reserves and programs.

2013	15,000	14,300	9,900	4,850	1,580
2014	15,150	14,300	9,720	4,950	1,596
2015	15,302	14,300	9,630	5,000	1,612

2010-2012 are the actual acre feet delivered to each agency. 2013-2015 are estimates provided by Wholesale Customer Agencies as of March 2013.

In 2008, a similar study also included a new wholesale water connection fee that is assessed to new connections for purposes of "buying into" the system. This places new customers on par with existing customers and is expected to generate revenue of approximately \$7,093 this year due to the continued low development activity.

Effective for Calendar Year 2014, this fee has increased by 2.33% as indexed to the 20 Cities Construction Cost Index ("CCI"):

Calculation:

CC Index @ March 2013	9,483.70
CC Index @ March 2012	9,267.57
Difference	216.13
% Change	2.33%

Note: these fees are indexed utilizing the 20 Cities Construction Cost Index (CCI) as recommended in the Financial Plan.

The following schedule lists the fee by meter size that is collected from each retail agency and in turn submitted to San Juan Water District:

Wholesale Connection Fees

Meter Size	Capacity Factor	2013	2014
3/4" Meter	ı0.60	\$354	\$362
1" Meter	1.00	\$588	\$602
1 1/2" Meter	2.00	\$1,178	\$1,205
2" Meter	3.20	\$1,884	\$1,928
3" Meter	6.40	\$3,767	\$3,855
4" Meter	10.00	\$5,887	<u>\$6,</u> 024
6" <u>Meter</u>	ı25.00	\$14,717	\$ <u>15,</u> 060
8" Meter	36.00	\$21,193	\$21,687
10" Meter	58.00	\$34,145	\$34,941
12" Meter	86.00	\$50,629	\$51,809

Functional Areas

Administration and General

For Wholesale activities, this includes: Office of the General Manager, Finance, General Services, Human Resources, Information Technology, Purchasing, Risk Management and Safety. Overall District costs related to auditing, consulting, Directors, general operations, legal and office expenses are recorded in this category.

Office of the General Manager is responsible for the overall administration of the District including: implementing District policies; developing and maintaining responsive District programs and services; providing leadership and motivation to District staff; maintaining and planning for fiscal integrity; promoting excellent customer service; maintaining strong relationships with local and regional regulatory and peer governmental agencies; providing direct support to the Board of Directors. Major initiatives for the next year include: monitoring Delta and other water supply issues, as well as protecting water rights and water supply reliability; District structure and succession planning; and District efficiency measures.

<u>Finance</u> is responsible for all financial operations in the District, including: financial planning and forecasting, budget development, accounting and fiscal administration, debt issuance and management, financial reports and annual audit, and water rates and charges analysis. Major initiatives for the coming year include: development of *Equipment and Vehicle Fee Schedule*; implementation of a new financial information system; and monthly reporting on department budgets.

<u>General Services</u> includes buildings, grounds, equipment and vehicle maintenance. A major initiative for the coming year is development of the Equipment and Vehicle Replacement Policy.

<u>Human Resources</u> provides support in recruitment, selection, development and retention of a talented workforce. This includes payroll and benefits administration. Major initiatives include monitoring legislation affecting the workplace and ensure compliance, and continue to promote a culture of excellent customer service.

Information Technology manages and supports all aspects of the District's information technology systems, including data and voice communications hardware and software, as well as implementation of the District's Information Technology (IT) Master Plan. Major initiatives for the next year will be completion of the new SCADA system, implementation of a new financial information system and the completion of network improvements including wireless networking.

<u>Purchasing</u> facilitates and coordinates: bidding and requests for proposals; acquisition of equipment, materials, services and supplies; contracts; and insurance certifications. Major initiatives for the next year will be completion of a Purchasing Manual to assist staff with purchasing procedures and questions.

<u>Risk Management and Safety</u> is responsible for the District's insurance, safety, loss control, and property/liability claims.

Conservation

The District provides water conservation technical and management support for retail member agencies and their customers. These efforts include workshops with subjects ranging from residential and large turf irrigation to pond management as well as management support for the retail member agency's public information and school education programs. The District hosts an annual "How To Landscape Day" that is open to the public, with participation by irrigation experts, nurseries, landscape design consultants and more. The District maintains and promotes a Water Efficient Landscape (WEL) Garden that is open weekdays and offers Saturday workshops throughout the year – all open to the public. In addition, the District has an extensive library of water efficiency material, provides speakers for school presentations, and coordinates an annual water-awareness poster contest. The District also serves as a technical resource for retail member agency's compliance with federal and state water regulations. On behalf of its retail member agencies, District staff attends and actively participates in meetings and workshops of the California Urban Water Conservation Council and the Regional Water Authority to affect and address statewide and regional conservation efforts and issues. This Department is fully compliant with Best Management Practices and reporting requirements. This Department is fully compliant with Best Management Practices and reporting requirements.

Engineering Services

In general, this Department is responsible for planning, designing and managing Wholesale capital improvement projects, assisting with operational improvements, and assisting with maintenance activities which contain an engineering component.

Transmission and Distribution

This area performs activities related to Wholesale mains and pipelines ranging in size from 6" to 90" in diameter and over 17 miles in length. This also includes the maintenance of the District's many wholesale water meters, air release valves and other appurtenances.

Water Treatment

The District operates and maintains its 120 million gallons per day (November 16th through May 14th) and 150 million gallons per day (May 15th through November 15th) conventional water treatment plant 24/7 and a 62 million gallon clearwell. The source water comes from Folsom Lake (surface water) and is treated using conventional flocculation, filtration and disinfection that is designed to remove many contaminants. The water treatment plant's potable (finished) water quality meets all federal and state drinking standards. Water treatment supplies potable water to approximately 265,000 customers resulting in water district's served by San Juan's Wholesale operation, including: San Juan Water District retail service area, Citrus Heights Water District, Fair Oaks Water District, Orange Vale Water Company, City of Folsom's northern area (Ashland) and Sacramento Suburban Water District.

Source of Supply - Wholesale

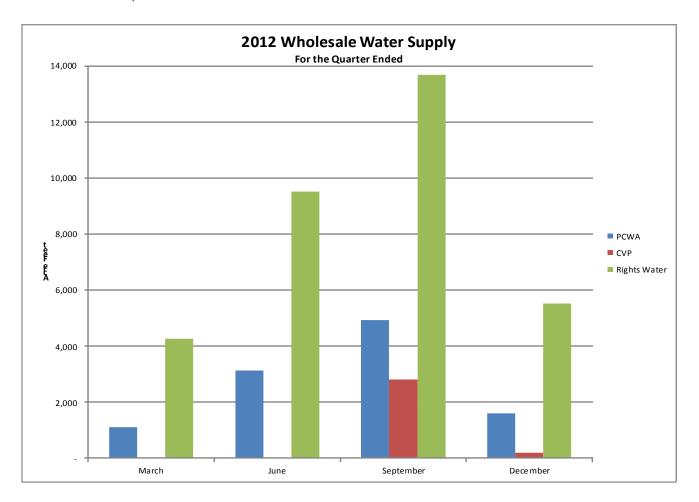

Source of supply is calculated based upon projected deliveries using a combination of historical and estimated values multiplied by the rate in effect, which may be estimated if not yet known. Projected deliveries used are in accordance with the budget assumptions that are provided by the retail agencies.

Source of Supply Rates

Total Wholesale Source of Supply			=	\$845,573.03					

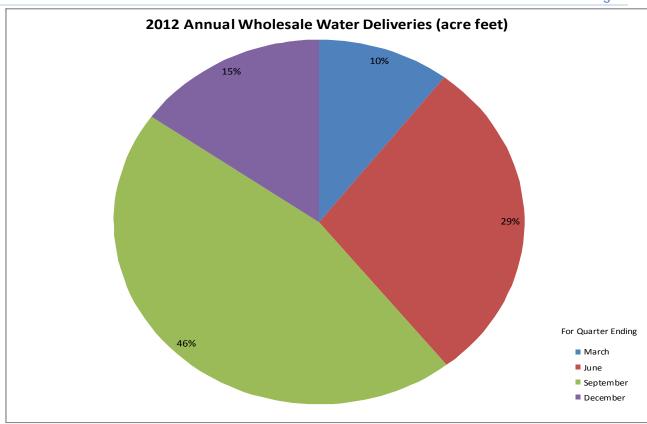

For reference, 2012 actual water supply by quarter is shown in the table below for the three sources of water:

- Pre-1914 Water Rights (33,000 acre feet)
- Central Valley Project Contract Water (24,200 acre feet); and
- Placer County Water Agency (PCWA) Contract Water (25,000 acre feet).

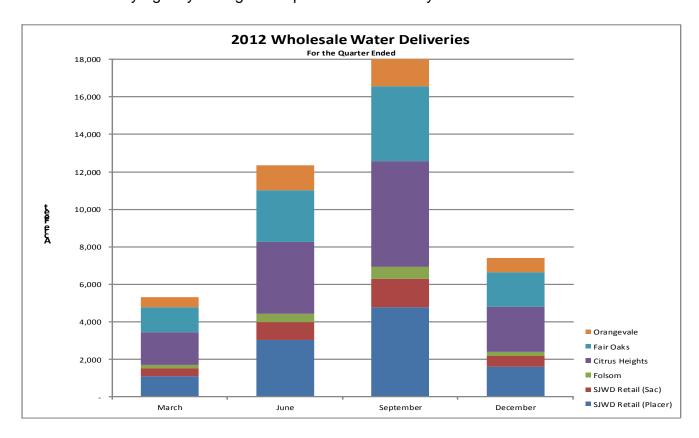

While PCWA water contract is a take or pay, the supply under that contract was much less than the 25,000 acre feet due to economic and conservation conditions.

Annual wholesale water deliveries can vary significantly dependent upon weather conditions as well as economic conditions as demonstrated in the last two years. However, the typical percentage of water deliveries by quarter remains relatively static and is presented in the following chart to provide an understanding of water use patterns.

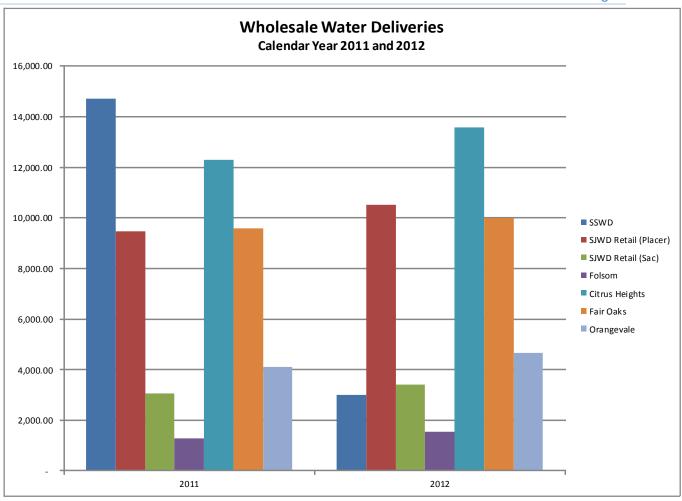

The deliveries by agency during each quarter of calendar year 2012 are shown next.

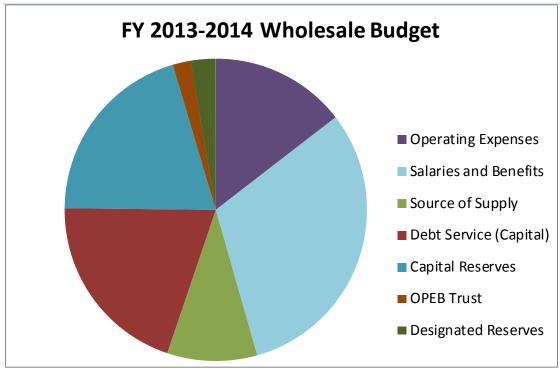

San Juan Water District

Fiscal Year 2012-2013 Accomplishments

- Upgraded unsupported FactoryLink SCADA with WonderWare SCADA
- Upgraded proprietary programmable logic controllers (PLC's) with Allen Brady PLC's and touch screens
- Over 2 months flow testing water treatment plant at 130 & 150 million gallons per day; now rated at 150 million gallons per day from May 15th through November 15th
- Updated our 1977 Water Supply Permit to our current 2013 water treatment plant operations
- Completed our primary chemical testing; did two presentations, one at AWWA Fall Conference and the other at American River Watershed Technician Committee saving \$385,000 annually
- Upgraded filter underdrain piping with shorter pipe run, new pumps and meter
- Completed Volatile Organic Compounds Waivers, waiting for CDPH approval
- Completed Synthetic Organic Compounds Waivers, waiting for CDPH approval
- Filled three (3) water treatment plant maintenance positions
- Filled one (1) water treatment plant operator position
- Completed RMP/PSM Audit (every 3 years)
- Updated Safety programs: LOTO, Confined Space, Arc Flash and PSM
- 11-month (after construction completed) inspection of CTBP & TWP; all punchlist repairs completed

Fiscal Year 2013-2014 Goals

- 2013 American River Watershed Sanitary Survey (every 5 years)
- Upgrade water treatment plant return water probe meter to a mag meter
- Upgrade Hinkle Reservoir's underdrain system (panel, piping and panel)
- Fill one (1) water treatment plant maintenance position

Capital Improvement Program - Wholesale

Wholesale facilities include those that allow the District to receive raw water, treat it for delivery to wholesale customers and perform all supporting activities to accomplish this. Specific examples are:

- raw water supply pipelines;
- water treatment plant;
- chlorine containment;
- filter gallery;
- · solids handling;
- Hinkle reservoir; and
- District buildings and grounds.

The District's Capital Improvement Program ("CIP") is viewed as two separate programs for Wholesale and Retail facilities. Most projects are not relevant to both Wholesale and Retail, therefore, they are evaluated and planned for completely separately. Some do benefit both Wholesale and Retail facilities and are assigned to each based upon specific benefit with Wholesale and Retail paying their fair share of the cost. To be considered a capital expense, the project, program or equipment must generally cost \$5,000 or more and have a useful life extending three years or more.

CIP Process

In order to develop and maintain the District's long-range CIP, the first step is completion of a Wholesale Master Plan. These are completed approximately every five years by an outside consultant with District staff assistance. All existing and future facilities are evaluated to support the District's CIP goals:

- Ensure that a reliable water supply is maintained and secured for future needs.
- Maintain or implement compliance with existing or new regulations.
- Address public safety or health standards.
- Plan contingently for reasonable emergency supply or outages.
- Ensure that existing infrastructure is maintained, replaced and improved.
- Provide for new capital projects to help meet the highest priority District needs.
- Result in more economical, efficient, or effective delivery of District services.

CIP projects are categorized as follows:

<u>District-Wide</u>: projects that benefit the District's internal operations such as information technology or building improvements.

<u>Pipeline Replacements</u>: projects related to the expansion, maintenance, or improvement of the District's transmission and distribution system.

<u>Chemical Feed Systems</u>: projects related to the maintenance, improvement or expansion of the District's chemical systems within the Water Treatment Plant.

<u>Filter Basins</u>: projects related to the construction, maintenance, improvement or expansion of the District's filter basins.

<u>Water Treatment Plant</u>: projects related to the construction, maintenance, improvement or expansion of the District's Water Treatment Plant facilities.

<u>Water Storage</u>: projects related to the construction, maintenance, improvement or expansion of the District's storage facilities.

Upon completion or update of the Wholesale Master Plan, the Wholesale Water Rate Study and Financial Plan are updated to reflect new or updated projects. This may not be necessary if the costs do not represent a major impact to the CIP. Projects are incorporated into the fiscal-year budget for the year they are expected to begin, with individual projects approved in accordance with District policy or prescribed codes (i.e. Public Contract Code).

District staff manage projects with the assistance of consultants where needed. District labor, inventory, materials, supplies and related costs may be required on a project and coded as such to reflect the full cost of the asset for financial reporting purposes. Upon completion of a project, Notice of Acceptance is filed (when applicable) and appropriate insurance coverage is secured by the District's insurer in accordance with the policy.

Fiscal Year 2012-2013 Accomplishments

- Replaced two (2) thirty-five year old single wall 20,000 gallon primary chemical tanks with two (2) 15,000 gallon double containment primary chemical tank
- Finished filter gallery valve replacement project
- Replaced and tested belt press (blue belt) with Teflon

Capital Contributions are received from agencies or other outside parties that participate in and/or benefit from capital projects. Cost sharing is in accordance with Board policy and/or an agreement or allocation as determined for that project.

Retail Budget

Cost Savings Measures

The District continually evaluates cost-saving measures that support fulfilling its mission. Staff regularly explores options to current processes or projects (pumping, transmission and distribution, engineering, conservation, customer service, administration, capital projects) that may present viable alternatives that save District customers money while providing a high level of service customers expect. To that end, this year the District has taken the following cost-saving measures with a table summarizing below:

- FY 2011-2012 Employees came forward with no Cost of Living Allowance ("COLA") on July 1, 2011, Increase Within Range or Incentive Compensation for employees which held salaries at current levels saving approximately \$119,100.
- FY 2011-2012+ implemented Employee cost-share of dependent dental with annual savings of \$6,900.
- FY 2011-2012 Utilize internal staff on planning, engineering and construction management of capital projects which saved approximately \$246,600 on the cost of outside consultants.
- FY 2011-2012 optimize Bacon Pumpstation Pressure and Kokila Reservoir Addition with Piping Modifications with estimated savings in avoided capital project costs for pumpstation and storage are approximately \$4,000,000 with annual savings of \$50,000-\$70,000 from reduced pumping.
- FY 2008-2009 Utilized COP credit rating process in-lieu of bond insurance with total savings of \$44,200.
- FY 2008-2009 CalPERS prepayment of annual employer contribution with savings of \$62,900.
- FY 2008-2009+ achieved AA+ credit rating on COPs with total debt service savings over the life of the COPs in the amount of \$2,320,000.
- FY 2008-2009 implemented Information Technology improvements including Virtual Servers and Shared Storage saving \$35,000 annually on reduced hardware, software support, maintenance and electricity with additional annual savings of \$37,500 annually due to elimination of need to fill Information Technology Technician position.
- FY 2008-2009 2011-2012 Identified partnering opportunity with Placer County on Barton Road Bridge Replacement and Auburn-Folsom Road Widening Projects for pipeline installations. Approximate savings of \$2,000,000.
- FY 2010-2011+ staff renegotiated credit card fees for acceptance of customer payments with annual savings of \$12,000.

- FY 2011-2012 Refunding Bonds with annual estimated debt service savings of \$23,000 until 2033 when paid off, total \$483,000.
- FY 2011-2012 Staff identified RWA Prop 50 Drought Assistance Grant monies available to reimburse SJWD's \$25,000 water efficiency rebate to an area high school.

Fiscal Year	Measure		Savings
2011-2012	No COLA/Step Increase/Incentive Compensation	Total	\$157,800
2011-2012+	Dependent dental employee cost-share	Total	\$6,900
2011-2012+	Internal staff-planning, engineering, construction management	Annual	\$246,600
2011-2012+	Reduced OPEB Costs	Annual	\$40,075
2011-2012 -	Refunding bonds, lower debt service	Annual	\$22,907
2032-2033		Total	\$481,057
2008-2009	COP credit rating process in-lieu of bond insurance	Total	\$44,200
2008-2009	CalPERS Contribution prepayment	Total	\$62,985
2008-2009+	AA+ Credit Rating on COPs	Total	\$2,320,000
2008-2009+	IT vitualization & shared storage	Annual	\$72,500
2009-2010	AFR Pipeline coordination w/Placer County	Total	\$2,000,000
2010-2011	Pipeline Project coordination with Wholesale	Total	\$155,500
2010-2011+	Credit card fees re-negotiated	Annual	\$12,000

Note: The Fiscal Year begins on July 1 and ends on June 30.

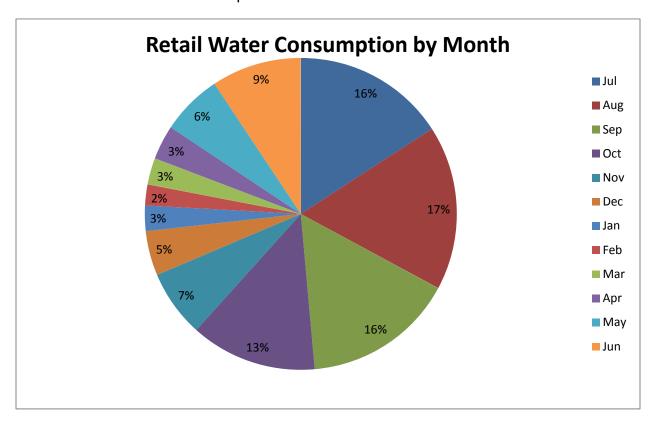

Retail Water Rate Study and Financial Plan

In 2011, the District contracted with the Reed Group, Inc. to prepare the Retail Water Rate Study and Financial Plan to determine water rates required to fund operations and the capital improvement program for the next ten years. This study was completed in March 2011. The study determined that there would be no retail rate increase required for 2012 and recommended 3.5% annual increases to maintain operations and complete the capital improvement program. Annual operating savings, one-time savings as well as debt service savings resulting from refunded bonds required that plan to be updated in April 2012. Increases recommended by the update are listed below.

This budget is prepared with the estimated rates from that plan for budgetary purposes; however, the Board adopts rates as part of the budget process each year and in accordance with Proposition 218. Through the budget process staff has incorporated actual financial results as well as projected budgets and updated capital improvement program. The updated financial plan information projects lower recommended rate increases over the next five years (subject to Board approval and update):

2014	2015	2016	2017	2018
2%	2%	2%	2%	2%

Retail water use by month is presented in the following table using calendar year 2012 data to demonstrate water use patterns.

The current rate structure and rate structure based upon the Retail rate increase for 2013 are presented next.

Residential Metered Rates

Calendar Year 2013 with 2% increase

The study included growth projections from a slight rebound in the economy anticipated for the future beginning in Fiscal Year 2013-2014. This potential growth adds water sales revenue connection fee revenue to applicable periods. The purpose of the retail water connection fee for new connections is considered a "buy in" component to the system in order to place new customers on par with existing customers.

It was recommended as a result of this study to prepare an updated connection fee study in the future, but until that time this fee is increased by 2.33% as indexed to the 20 Cities Construction Cost Index ("CCI") which will be effective for Calendar Year 2014:

Calculation:

 CC Index @ March 2013
 9,483.70

 CC Index @ March 2012
 9,267.57

 Difference
 216.13

 % Change
 2.33%

Note: these fees are indexed utilizing the 20 Cities Construction Cost Index (CCI) as recommended in the Financial Plan.

There are some small developments expected for Fiscal Year 2013-2014, so the budget includes \$1,105,402 this year to reflect this. The following schedule lists the fee by meter size that is collected from customers connecting to the San Juan Water District retail system:

Retail Connection Fees

Functional Areas

Administration and General

For Retail activities, this includes: Office of the General Manager, Finance, General Services, Human Resources, Information Technology, Purchasing, Risk Management and Safety. Overall District costs related to auditing, consulting, Directors, general operations, legal and office expenses are recorded in this category.

Office of the General Manager is responsible for the overall administration of the District including: implementing District policies; developing and maintaining responsive District programs and services; providing leadership and motivation to District staff; maintaining and planning for fiscal integrity; promoting excellent customer service; maintaining strong relationships with local and regional regulatory and peer governmental agencies; providing direct support to the Board of Directors. Major initiatives for the next year include: increasing water supply reliability in the retail service area; District structure and succession planning; and District efficiency measures.

<u>Finance</u> is responsible for all financial operations in the District, including: financial planning and forecasting, budget development, accounting and fiscal administration, debt issuance and management, financial reports and annual audit, and water rates and charges analysis. Major initiatives for the coming year include: development of *Equipment and Vehicle Fee Schedule*; implementation of a new financial information system; and monthly reporting on department budgets.

<u>General Services</u> includes buildings, grounds, equipment and vehicle maintenance. A major initiative for the coming year is development of the Equipment and Vehicle Replacement Policy.

<u>Human Resources</u> provides support in recruitment, selection, development and retention of a talented workforce. This includes payroll and benefits administration. Major initiatives include monitoring legislation affecting the workplace and ensure compliance, and continue to promote a culture of excellent customer service.

<u>Information Technology</u> manages and supports all aspects of the District's information technology systems, including data and voice communications hardware and software, as well as implementation of the District's Information Technology (IT) Master Plan. Major initiatives for the next year will be implementation of a new financial information system and the completion of network improvements including wireless networking.

<u>Purchasing</u> facilitates and coordinates: bidding and requests for proposals; acquisition of equipment, materials, services and supplies; contracts; and insurance certifications. Major initiatives for the next year will be completion of a Purchasing Manual to assist staff with purchasing procedures and questions.

<u>Risk Management and Safety</u> is responsible for the District's insurance, safety, loss control, and property/liability claims.

Conservation

The Conservation Department provides free services to assist customers with increasing their water efficiency. The district partners with federal, state and local entities to fund various water-efficient rebate programs. Conservation monitors all grant programs and prepares status reports to the issuing entity as required. The department's highly-trained staff provides workshops to educate customers about water efficient practices and provides leak detection assistance. Staff participates in regional efforts to promote the efficient use of water. Because Conservation is in constant close contact with retail customers, the department plays a major role in the District's water efficiency outreach efforts. Conservation is involved in the development of "how to" and videos, media interviews to promote events, and other water efficiency programs, such as 20 x 2020. This Department is fully compliant with Best Management Practices and reporting requirements.

Customer Service

This department provides friendly, personal customer service to the District's 10,500 Retail connections including numerous billing and payment options while ensuring compliance with Government Codes on billing and notices, Red Flag Rules and the Payment Card Industry Data Security Standards. Because Customer Service is in constant close contact with retail customers, the department plays a major role in the District's public relations and outreach efforts. Customer Service strategizes with our public affairs experts in developing all of our outreach efforts, including the WaterGram, our website, videos, Consumer Confidence Report, special mailers, and water efficiency programs, such as 20 x 2020. Customer Service provides administrative assistance with the annual backflow device testing; and reports water use and connection data internally and to various federal, state, and local entities; and prepares customer correspondence. Customer service also encompasses meter reading and service box identification and clearance.

Engineering Services

In general, this Department is responsible for planning, designing and managing Retail capital improvement projects, assisting with operational improvements, and assisting with maintenance activities which contain an engineering component. Engineering is also responsible for review, approval, management, and inspection of new development funded distribution system improvement projects.

Pumping and Telemetry

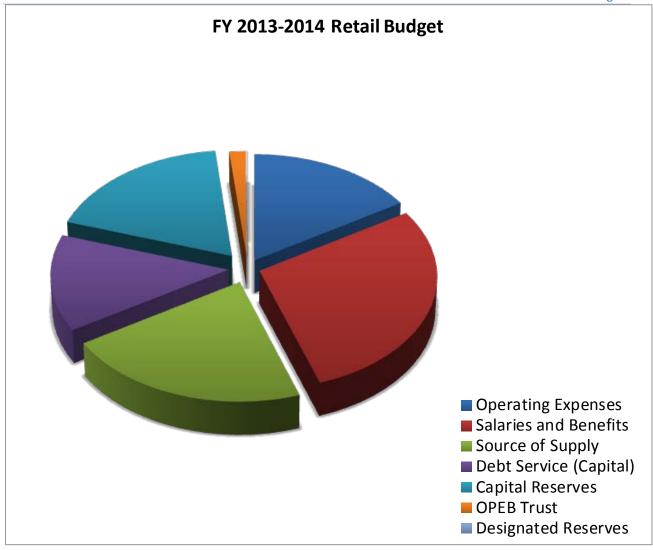

This area performs activities related to the District's 5 pumping sites and ensures adequate water pressure and storage is maintained throughout the District's Retail service area.). The Distribution System is comprised of 5 pumping sites which contain 9 pump stations and has a total of 9 pressure zones, one of which is a gravity supplied zone. In addition, there is the Los Lagos Tank Site which has the storage capacity of 1.65 MG, Mooney Hydro pneumatic tank site which has the storage capacity of 0.50MG and Kokila Reservoir, which is a hypalon covered in-ground storage facility with the capacity of 4.56 MG. These sites ensure adequate water pressure and storage is maintained throughout the District's Retail service area.

Transmission and Distribution

This area performs activities related to the maintenance and operation of Retail mains, distribution pipelines, fire hydrants, water services and other appurtenances. This includes pipelines 200 miles in length ranging in size from 1" to 90" in diameter and 10,500 customer water services.

Fiscal Year 2012-2013 Accomplishments

<u>Customer Service</u>

- PCI Data Security Standard Compliance (at a much lower cost than anticipated saved \$15,000)
- FedEx delivery of Notices of Intent to Disconnect (frees up field crew to perform maintenance tasks/reduces OT)
- Completed data conversion to update residential customer accounts with detailed data to enable us to calculate water budgets, if/when required.

Capital Improvement Program - Retail

Retail facilities include those that allow the District to deliver water to retail customers and perform all supporting activities to accomplish this. Specific examples are:

- transmission and distribution pipelines;
- · pump stations;
- pressure reducing stations;
- storage tanks;
- meters; and
- District equipment and buildings.

The District's Capital Improvement Program ("CIP") is viewed as two separate programs for Wholesale and Retail facilities. Most projects are not relevant to both Wholesale and Retail, therefore, they are evaluated and planned for completely separately. Some do benefit both Wholesale and Retail facilities and are assigned to each based upon specific benefit with Wholesale and Retail paying their fair share of the cost. To be considered a capital expense, the project, program or equipment must generally cost \$5,000 or more and have a useful life extending three years or more.

CIP Process

In order to develop and maintain the District's long-range CIP, the first step is completion of a Retail Master Plan. These are completed approximately every five to ten years by an outside consultant with District staff assistance. All existing and future facilities are evaluated to sustain the District's cost-effective CIP goals:

- Ensure that delivery of a reliable water supply is maintained and secured for future needs.
- Maintain or implement compliance with existing or new regulations.
- Address public safety or health standards.
- Plan contingencies for reasonable emergency supply or outages.
- Ensure that existing infrastructure is maintained, replaced and improved as necessary.
- Provide for new capital projects to help meet the highest priority District needs.
- Develop and implement more economical, efficient, or effective delivery of District services.

CIP projects are categorized as follows:

<u>District-Wide</u>: projects that benefit the District's internal operations such as information technology or building improvements.

<u>Pipeline Replacements</u>: projects related to the expansion, maintenance, or improvement of the District's transmission and distribution system.

<u>Pump Stations</u>: projects related to the maintenance, improvement or expansion of the District's pump stations.

<u>Pressure Reducing Stations</u>: projects related to the construction, maintenance, improvement or expansion of the District's pressure reducing stations.

<u>Storage Tanks</u>: projects related to the construction, maintenance, improvement or expansion of the District's storage facilities.

<u>Development Projects</u>: projects needed to serve new development, which are funded by the developer, and conveyed to the District for long-term operation and maintenance.

Upon completion or update of the Retail Master Plan, the Retail Water Rate Study and Financial Plan are updated to reflect new or updated projects. This may not be necessary if the costs do not represent a major impact to the CIP. Projects are incorporated into the fiscal-year budget for the year they are expected to begin, with individual projects approved in accordance with District policy or prescribed codes (i.e. Public Contract Code).

District staff manage projects with the assistance of consultants where needed. District labor, inventory, materials, supplies and related costs may be required on a project and coded as such to reflect the full cost of the asset for financial reporting purposes. Upon completion of a project, Notice of Acceptance is filed (when applicable) and appropriate insurance coverage is secured by the District's insurer in accordance with the policy.

Fiscal Year 2012-2013 Accomplishments

- Negotiated renewal pricing for T&M contract after vendor proposed large increase, resulting in bid process savings as well as savings throughout the course of the coming year.
- Implemented a tracking procedure for BOE Out-of-State Tax to avoid penalties and ensure District is in compliance with required reporting on out-of-state purchases.
- Replaced vehicles and backhoe in accordance with vehicle replacement guidelines.
- Implemented approved Quarterly D/DBP stage 2 samples site
- Completed design and construction of the 24-inch Auburn Folsom Road Transmission Main Middle Phase project.
- Completed the Design of the Retail portion of the SCADA Integration and Improvements project.
- Completed the design and construction of the 24-inch AFR WTP Onsite Transmission Main project.
- Completed the design of the Stevens Ave Main and Services Replacements project.
- Completed the design of the Golden Gate Services Improvements project.
- Completed the Vane Court Services Relocation project.
- Initiated the design of the Cherry Ave Services Replacement Project.
- Initiated the design of the Kezar Street Services Replacement Project.
- Initiated the design of the Keets Circle Services Replacement Project.

Cost Allocation Plan

The San Juan Water District is organized as a community services district with both wholesale and retail operations. Upon establishment, it was determined to be most cost effective for these two separate operations to share some facilities and employees in order to minimize costs. While sharing some resources, the revenues and expenses are recorded in a separate set of accounts for each for financial accounting and reporting purposes. Cash is maintained in pooled accounts in order to maximize interest and investment earnings opportunities while separately accounted for with respect to each component of cash reserves.

Due to the size and nature of all District operations, established allocation methods are relatively simple lacking the complexity that would require additional staff time to maintain. Allocations are updated as changes occur in the bases or operating factors. Costs are allocated to Wholesale and Retail using several methods:

- direct for those costs that are specifically identifiable to apply to either;
- proportionate for those costs that benefit both based upon the appropriate base (i.e. full-time equivalent employees ("FTE"), building occupancy, number of connections, etc.).

Direct costs are simply those costs that apply either to Wholesale or Retail, or some percentage of each that can be determined by the nature of the cost. Proportionate costs are assigned to Wholesale or Retail based upon the benefit received using the base as described above which most accurately reflects this.

Labor

As mentioned previously, some employees are shared by Wholesale and Retail to maximize efficiency and eliminate the need for redundant positions thereby minimizing any idle time. The table provided next lists all District positions and their respective budgeted assignment to Wholesale or Retail activities for both operations and capital projects. Employees code time to reflect actual work activity, which can vary from year-to-year depending upon weather conditions, capital projects, legislative and regulatory changes, etc. However, this reflects the overall assignment for each and a basis for other cost assignments.

Building Operations and Maintenance Costs

District employees are assigned work locations in one of three buildings which are located on District property: Administration Building, Shop Building and Water Treatment Plant Building. Costs related to building usage or maintenance are allocated on FTE, broken down by building as follows:

Administration Building - FTE Cost Allocation							
Department	Position	FTE	Wholesale	Retail			
Executive	Assistant General Manager	1	0.60	0.40			
Executive	General Manager	1	0.90	0.10			
Executive	Admin Asst/Board Secretary	1	0.50	0.50

Indirect Cost Rates

Indirect cost rates are calculated in the table below; however, a standard rate is used for simplification purposes in the detail position rates schedule which listed on the next page. The District currently uses 15% as this standard to recover indirect costs and properly assess these costs where applicable. (Note: some costs may be re-defined to direct costs as the allocation plan is updated to fully reflect only indirect costs.)

Wholesale		
<u>Direct Costs</u>		
Category		Amount
Source of Supply	\$	845,628
Water Treatment		1,976,210
Conservation		284,554
Engineering		59,696
Transmission		133,382
Total Direct Costs	\$	3,299,470
Indirect Costs		
Administrative & General	\$	1,540,965
ОРЕВ		168,000
Total Indirect Costs	\$	1,708,965
Overall Indirect Cost Rate		51.800%
(Indirect Costs Divided by Direct Costs, 15% u	sed l	historically)

Total Indirect Costs	\$	1,166,715					
Overall Indirect Cost Rate		19.380%					
(Indirect Costs Divided by Direct Costs, 15% u	sed I	historically)					

Labor Rates

Rates are listed by position in the table on the next page to provide a billing rate in the event costs will be recovered from a customer, agency or outside party for any employee time. The cost listed is for the top step of the salary range, as many employees have been employed by the District for a long time and as such have reached the top step. In addition, this reduces complexity in maintaining this rate schedule in keeping with the District's goal in establishing straightforward, easy to manage processes.

Note: In 1978 the voters of the State of California passed Proposition 13 which limited property taxes to a total maximum rate of 1% based upon the assessed value of the property being taxed. Each year, the assessed value of property may be increased by an "inflation factor" (limited to a maximum increase of 2%). With few exceptions, property is only reassessed at the time that it is sold to a new owner. At that point, the new assessed value is reassessed at the purchase price of the property sold. The assessed valuation data shown above represents the only data currently available with respect to the actual market value of taxable property and is subject to the limitations described above.

⁽¹⁾ Pump stations were assigned directly to Retail beginning January 1, 2011. Prior to that, costs were recovered through the Wholesale Rate charged to SJWD Retail.

⁽²⁾ Connections in Italic are projected as that agency's fiscal year end is 12/31.

⁽³⁾ The District updated population statistics in its 2010 Urban Water Management Plan.

Glossary

Account – A record of a business transaction; a reckoning of money received or paid.

Accounting System – The total structure of records and procedures that discover, record, classify, summarize, and report information on the financial position and results of operations of a government entity.

Accounts Payable – Purchase of services and supplies as of or prior to June 30 but not yet paid at June 30.

Accounts Receivable - General bills due from customers.

Accrual – The recognition of a revenue or expense in a budget year even though the actual cash may not be received or paid until the following budget year.

Acre-Feet of Water (AF) – The volume of water that would cover one acre to a depth of one foot.

Adoption – Formal action by the Board of Directors.

American Water Works Association (AWWA) – An international nonprofit scientific and educational society dedicated to the improvement of water quality and supply.

Amortization – Gradual reduction, redemption, or liquidation of the balance of an account; according to a specified schedule of times and amounts.

Assets – Resources owned or held by the enterprise as a result of past events and from which future economic benefits are expected to flow to the enterprise.

Association of California Water Agencies (ACWA) – Association representing over 400 public water agencies consisting of municipal, irrigation, county and California water districts, and a number of special purpose agencies. ACWA also represents non-profit and non-public mutual water companies. Members provide the link between local, state and federal water projects, and ultimate water consumers.

Audit – Performed by the District's independent certified public accountant (CPA), with the objective to determine if the District's financial statements present fairly the District's financial position and results of operations in conformity with generally accepted accounting principles (GAAP).

Budget – The District's financial plan balancing proposed expenditures for a certain period of time to the expected income or revenue for that same period.

Connection Fee – Fee imposed when a customer requests a new service connection. Connection fee funds are used by the District to plan, design and construct new facilities to support the additional demand placed by on the water and sanitation systems by the new service connections.

Capital Assets – Assets of a long-term nature such as land, buildings, machinery, furniture, plants and transmission and distribution infrastructure, and other equipment. Generally, the District has defined such assets as those with an expected life in excess of three years and an acquisition cost in excess of \$5,000.

Capital Improvement Program (CIP) – A plan to provide for the maintenance or replacement of existing assets, infrastructure, and equipment and for the construction or acquisition of new facilities and equipment.

Capital Improvement Project Funds – Funds used to account for financial resources used for the acquisition or construction of major capital facilities, as approved in the five year Capital Improvement Plan.

Certificates of Participation (COP) – Form of lease-purchase financing used to construct or acquire capital facilities and equipment.

Coverage – A margin of safety for payment of debt service, reflecting the number of times by which earnings for a period of time exceed debt service payable in such a period.

Customer Information System (CIS) – A system maintaining customer data including usage, billing and payment information.

Debt – An obligation resulting from the borrowing of money or from the purchase of goods and services. These include bonds and accounts payable.

Debt Service – Interest and principal payments on bond issues and Certificates of Participation. Also included are the issuance costs related to bond funding.

Depreciation – An element of cost resulting from the service of long-lived assets in an economic organization and represents the loss in asset value because of wear, deterioration, obsolesce or action of the physical elements.

Effluent – Treated wastewater discharged from wastewater treatment plants.

Emergency Response Plan (ERP) – Emergency Response Plan as required by the Environmental Protection Agency (EPA) as it applies to water treatment and distribution with high or moderate hazard potential to life and property. The EAP consists typically of notification procedures to alert the appropriate authorities in the event of a hazardous condition developing and also includes continuous monitoring of the facility to provide an early warning to the operator.

Enterprise Fund – A fund established to account for the financing of self-supporting enterprises, such as a utility fund, which render services primarily to the public.

Entity - The basic unit upon which accounting and/or financial reporting activities focus.

Expenses – Decreases in economic benefits during the accounting period in the form of outflows or depletions of assets or incurrences of liabilities that result in decreases in equity.

Fiscal Year – The beginning and ending period for recording financial transactions. The District has specified July 1 to June 30 as its fiscal year.

Full Time Equivalent (FTE) – An FTE equates to one full-time employee working 2,080 hours per year.

Fund – An accounting entity that records all financial transactions for specific activities or government functions.

Fund Equity – Net assets which are comprised of: Invested in Capital Assets, Net of Related Debt; Restricted; and Unrestricted.

Geographic Information System (GIS) – A system combining computer hardware, software, and geographic data for collecting, storing, analyzing and displaying geographically referenced information.

Generally Accepted Accounting Principles (GAAP) – Accounting standards and financial reporting practices promulgated by several national committees and boards. Primary sources for governmental accounting are the National Council on Governmental Accounting, producing governmental accounting, auditing and financial reporting (GAAFR), the Governmental Accounting Standards Board (GASB), and the Government Finance Officers Association (GFOA).

Governmental Accounting Standards Board (GASB) – National advisory board of accounting standards for public agencies. Identifies procedures, methods and standards for presenting the financial condition of public agencies.

Infrastructure – The accumulated pipelines, treatment plants and storage facilities of the District, including all meters, valves, pumps, filters and other appurtenances, whether constructed by the District or dedicated by private entities.

Line Item – Expenditure classifications established to account for and budget the appropriations approved.

Local Agency Investment Funds (LAIF) – An investment fund established by the California State Treasurer for the benefit for public agencies. The District, per its investment policy may invest up to the maximum permitted under State law (California Government Code Section 16429.1).

Maintenance – The upkeep of physical properties in condition for use or occupancy. Examples are the inspection of equipment to detect defects and the making of repairs.

Net Assets – The excess of assets over liabilities, represents the cumulative effect of revenues and other financing sources over expenses and other financing uses.

Obligations – Amounts that a government may be legally required to meet out of its resources. They include not only actual liabilities, but also encumbrances not yet paid.

Operating Expenses – All costs associated with the day-to-day business of the District, which are not considered capital improvements or debt repayments.

Projected – An estimate of revenues and expenditures based on past trends, the present economic situation and future financial forecasts.

Public Employees Retirement System (PERS) – An agent, multiple-employer, public retirement system to which the District contributes that acts as a common investment and administrative agent for participating public entities within the State of California.

Pump Station – Mechanical devices installed in sewer or water systems or other liquid-carrying pipelines that moves the liquids to a higher level.

Reserves – An amount set aside in an account for future use.

Reservoir – A pond, lake, tank, or basin (natural or engineered) where water is collected and stored.

Resolution – A special or temporary order of a legislative body; an order to a legislative body requiring less legal formality than an ordinance or statute.

Revenue – An inflow of assets, not necessarily in cash, in exchange for services rendered.

San Juan Water District Fiscal Year 2013 - 2014 Budget

Supervisory Control and Data Acquisition (SCADA) – The Supervisory Control and Data Acquisition system collects operational data from remote units to monitor and control water and wastewater systems and facilities throughout the District service area.

Water Treatment Plant (WTP) – A facility that monitors and controls the quality of water, to include purity and turbidity as required by state and federal guidelines.

Working Capital – The difference between current assets and current liabilities which represents the amount available for operations, designated reserves or capital projects.
